☐	High-camp sleeping gear and shared climbing equipment	Confirm operator	Confirm
☐	Porter / baggage weights and limitations	Confirm operator	Confirm
☐	Rescue, first-aid and oxygen support	Confirm operator	Confirm

BEFORE YOU PACK

8,000 m expeditions require a mountain-specific personal gear briefing. Supplemental oxygen varies by objective and operator, and its use is never assumed. Obtain written confirmation of the team equipment and rescue plan.

Medical supplies and altitude-related medicines should be discussed with a qualified clinician. The list is not a substitute for route-specific safety training, instruction or official gear requirements.
